Shh ----- You can't see me.

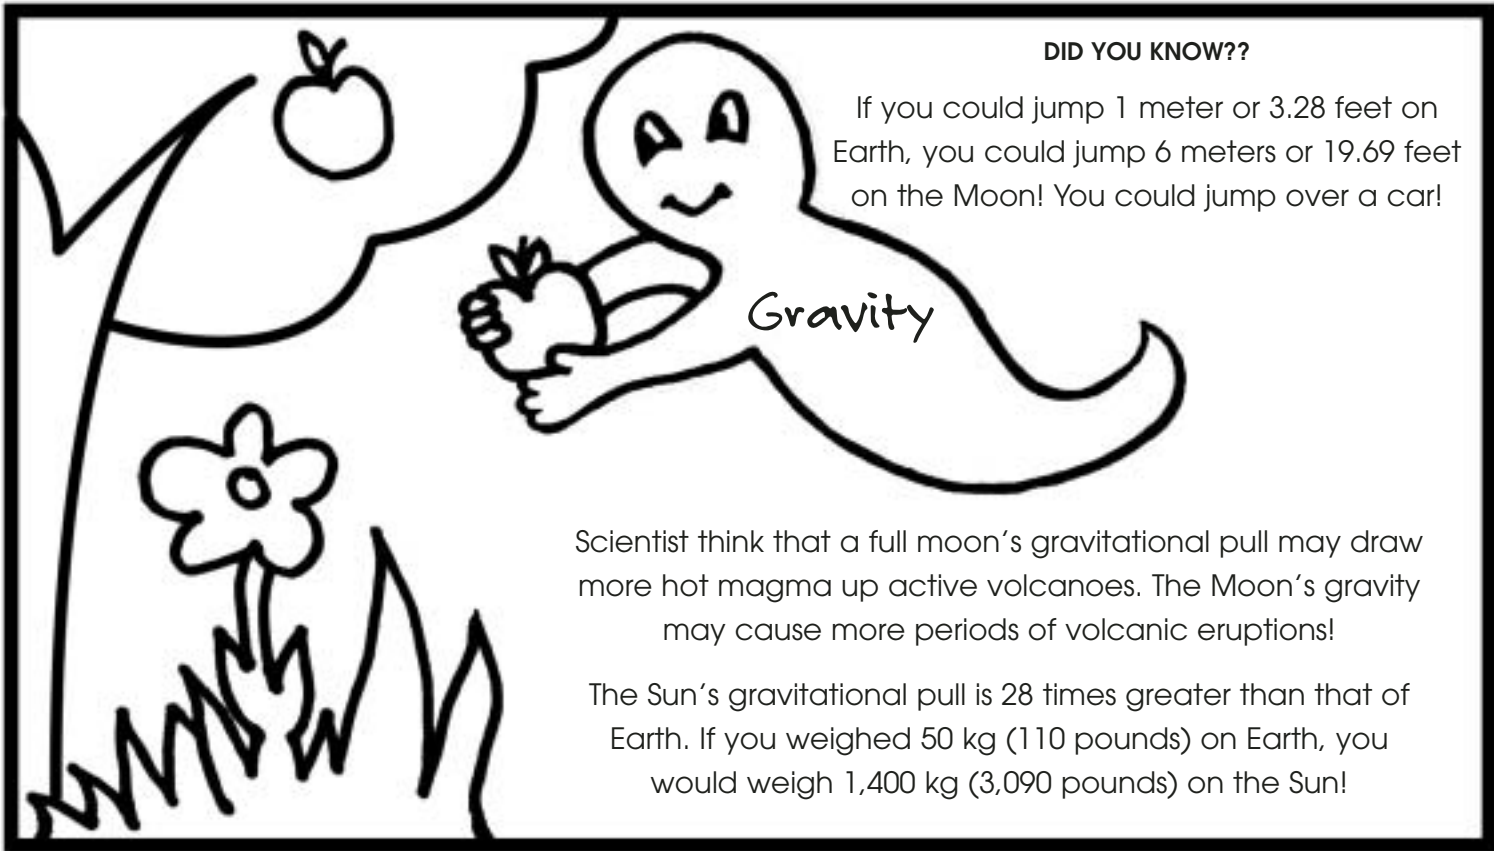

I am strong. I have pull.

I pulled down the apples.

Finish drawing gravity.
Draw an apple or a ball in its hands.

DID YOU KNOW??

If you could jump 1 meter or 3.28 feet on Earth, you could jump 6 meters or 19.69 feet on the Moon! You could jump over a car!

Scientists think that a full moon's gravitational pull may draw more hot magma up active volcanoes. The Moon's gravity may cause more periods of volcanic eruptions!

The Sun's gravitational pull is 28 times greater than that of Earth. If you weighed 50 kg (110 pounds) on Earth, you would weigh 1,400 kg (3,090 pounds) on the Sun!
